Professional Summary

Hardworking and dedicated Flutter mobile developer with 4 years of experience building, testing, and deploying cross-platform mobile applications. Known for a strong work ethic, adaptability, and the ability to collaborate effectively within a team or independently to meet project goals. Skilled in creating smooth user experiences and integrating APIs to enhance app functionality. A finalist in the HNG program, demonstrating a commitment to continuous growth and professional excellence. Seeking to leverage my expertise in Flutter to contribute to a forward-thinking organization.

Technical Skills

- **Mobile Development:** Flutter, Dart
- **Backend Development:** Node.js, Nestjs
- **Languages:** Java, Python, HTML5, CSS3, android
- **Tools:** Git, GitHub, Firebase, RESTful APIs
- **Other:** Agile methodologies, UI/UX design basics

Professional Experience

Various Projects

Jan 2021 - Present

flutter developer

remote

- Developed and deployed 5+ mobile applications using Flutter, available on the Google Play Store, with a focus on clean code and performance optimization.
- Integrated RESTful APIs, Firebase, and real-time data syncing, improving user experience and engagement metrics by over 30%.
- Collaborated with cross-functional teams, including designers and backend developers, to streamline development cycles and deliver projects ahead of schedule.

HNG

Aug 2024 - Oct 2024

Internship Project (HNG Program)

Remote

Finalist in HNG Internship Program as a flutter developer

- Developed a mobile app prototype as part of the HNG internship, successfully becoming a finalist.
- Created a fully functional, scalable application within tight deadlines, showcasing adaptability and teamwork.
- Led a team of 38 in developing a boilerplate, enhancing leadership skills and ensuring project alignment with goals
- Delivered a scalable application, enhancing leadership and problem-solving skills, and contributing to the team's success as finalists
- Implemented real-time data synchronization and optimized performance, showcasing adaptability and technical expertise under tight deadlines.
- Developed mobile app prototypes using Flutter, focusing on consuming APIs and maintaining a seamless user experience with a pixel-perfect UI design.

Projects

In-house Deployment

ClockPath

- Description: Developed an organizational app for tracking employee attendance with automated real-time time-stamping.

Apple Store

SharePath

- Created a social-financial app that enables users to invite others to join a group, split subscription payments, and communicate through a real-time chat feature.
- Integrated real-time notifications to keep users updated on group activity.
- Successfully launched on the Apple Store with a high user retention rate, primarily due to the real-time communication and notifications feature.

Google Play Store and Apple Store

Lola

- Developed a fintech app designed for seamless banking, allowing users to make payments, purchase data, and manage financial transactions efficiently.
- Achieved over 10,000 active users across both platforms, demonstrating a scalable, user-friendly interface that supports high-traffic transactions.

HNG Program

remote

Internship Project

Aug 2024 - Oct 2024

- Developed a mobile app prototype as part of the HNG internship, successfully becoming a finalist.
- Created a fully functional, scalable application within tight deadlines, showcasing adaptability and teamwork.

Portfolio

ToChSyn App

- Developed a contact-sharing app that enables seamless exchange of contact information by scanning NFC tags.
- Contacts are saved to a local database for easy access and offline availability.

Portfolio

Boiler Plate

- Created a boilerplate template showcasing various products, allowing developers to incorporate their own methods and customize functionalities for different use cases.

Portfolio

Nike Store

- Built a minimalistic e-commerce app designed to showcase and sell products like shoes and accessories.
- Implemented a simple UI for smooth browsing and purchasing experience.

Portfolio

CodeGranite (Desktop Application)

Nov 2023 - Jan 2024

- Designed a desktop application using Flutter to track project progress, milestones, and updates.
- Integrated with a custom API to sync project data across devices and provide real-time updates for team members.

Portfolio

E-Commerce Web Application

- Developed a comprehensive e-commerce web application using Flutter, allowing users to browse, add to cart, and purchase products online.
- Integrated with a backend API to handle user authentication, product inventory, order management, and payment processing.

Education

National Institute of Information Technology (NIIT)

Nov 2021 - Apr 2024

Diploma, Software Engineering

- **Coursework:** Mobile App Development, Java Programming, Web Development

Certifications

- **Google Mobile Web Specialist:** 2023
- **Flutter & Dart - The Complete Guide:** Udemy, 2022
- **HNG Internship Finalist:** Achieved finalist status in the HNG Internship 11 (2024) program in the Mobile Development track, placing in the top 523 out of 24,123 participants. This recognition highlights proficiency and excellence in mobile app development within a professional setting.
- **Diploma in Software Engineering**

Achievements

HNG Program Finalist

- Successfully reached the final round in the HNG Internship Program, which involved intensive mobile app development tasks and collaboration.
